

## EE422C Project 3 (Word Ladder) Team Plan

*<Kyle Polansky><KPP446>*

*<Nicole Muzquiz> <NGM339>*

*Fall 2016*

Kyle wrote BFS, getPosition, and printLadder methods.

Nicole wrote DFS and hammingDistanceOne methods.

Only DFS needed to be thoroughly tested and was done by both students.

We spent approximately 4.5 hours together in the same room. GitKraken was used to push and pull code and project finished while working together.

The final testing was done together.
